Enterprise Service Computing: From Concept to Deployment Robin G. Qui
Significant research and development advancement has been achieved in enterprise computing, integration, and management. The results of this advancement stimulate the creation of a new class of mission-critical infrastructures, a new category of integration methods and software tools, and a new group of business platforms for cost-effectively exploiting, integrating, and managing business operations across enterprises. Enterprise Service Computing: From Concept To Deployment presents the emerging service computing, or service-enabled computing, technologies currently preferably used in integrating enterprise-wide and cross-enterprise applications. The topics covered range from concept development, system design, modeling, and development technologies, to the final deployment, providing both theoretical research results and practical applications.
