With recent federal, state, and quality assessment requirements, continuing education in phlebotomy has never been more important. This is the ideal review book and CD-ROM to prepare for national board certification exams or to keep current in this dynamic field. Simulating the exact format and organization of topics on the board examinations, it contains over 650 multiple-choice questions with explanations and complete references. The CD-ROM perfectly prepares students for the computerized format of the exam with a diagnostic exam for self-assessment and a diagnostic report which records students' results in specific content areas. This new edition has also been updated to correspond with Garza/Becan-McBride's Phlebotomy Handbook, 7/e (2005) - if a user chooses to use both titles. Clinical Lab Science Students / Medical Technology Students.
