Paris Tosen

GOD is DNA: Salvation, the Church, and the Molecular Biology of the Gnostics Paris Tosen
In ancient times, the creator was God and he was the chief scientist of creation. Until we discovered DNA in 1953. DNA has proven to be God's toughest competitor. Both of them are invisible, omnipotent, omniscient and have mastered genetic manipulation. In GOD is DNA, author Paris Tosen provides a radical, if not innovative, revision of the all-mighty father figure using ancient Gnostic teachings. Tosen delves into the Nag Hammadi codices, all authenticated by biblical scholars, this time using biology as his guide. Never before have spiritual gospels been translated into biological revelation. Christian or not, this truth is for everyone with DNA inside their body. Using vivid examples, GOD is DNA makes a compelling case that worshiping an invisible man on a magic cloud isn't just unscientific, but it is a direct rejection of what Jesus taught. The true Jesus was a microbiologist.
