You need to show that you have taken an interest in finding out about the industry, and have some ideas about what you want for your own pool. This guide is simple and not too detailed but will give you some great ideas and a general guideline to how things work in the industry, the process and what happens as you move forward.

Q – What are some interesting things readers might learn from this guide?

A – If you’re in the market for a pool, you can learn about the swimming pool construction business and process, how to maintain your pool and something about the costs, the importance of buying sustainable products, environmental considerations when buying a pool, how your particular outdoor space can be

effectively designed no matter how large, small or awkwardly shaped it may be.

A – Anyone who is interested in having a tropical paradise or just a simple dip pool in their backyard. If you are being urged by the kids or other members of the family, I urge to get this book and just find out if it is for you.
