[This] book's unfading preoccupation with social context, social processes, and social structures distinguishes itself and greatly contributes to the discourse in gerontology."--**The Gerontologist**

This is a comprehensive textbook for both undergraduate and graduate level courses, detailing the impact of societal forces on the aging process. The book focuses on the diversity of the older population, examining it from micro/macro perspectives in order to understand aging and the life course as social phenomena.

This text encourages students to examine aging from personal, familial, community, societal and global perspectives, including both the positive and negative realities of aging.
