Fusion: Ignition in T minus 36 hours... Mr. Gerald M Kilby
FUSION: Random events ignite a chain reaction with devastating consequences. Electronic surveillance expert Charles Gardner arrives in Monaco to spend a few days with his daughter, who is covering the launch of the ITER fusion reactor for a major news channel. But, in the darkness of the harbour night, he sees something he shouldn't — the brutal murder of a young woman on-board a luxury super yacht. When local Detective Madelaine Duchamp is forced to drop the investigation in to the murder, she teams up with Charles who decides to use his own particular set of skills, and uncovers a plot to destroy the massive reactor before it goes live. Now it's no longer just about the murder on-board the yacht, it's not even about the reactor. For Charles, it's about the life of his daughter, who's on-site in the ITER control room - a target of the attack. With time running out, no help from the authorities, and hunted by deadly micro-drones, Charles and Madelaine must find a way to avert this catastrophe. But first – they have to stay alive. "If you like intelligent characters, exotic locations and fast paced techno thriller action, then look no further, FUSION has everything you need for a very enjoyable read."
